If your employer uses E-Verify, did they...

1. Threaten to use (or actually use) E-Verify on you once you started organizing for better working conditions or your rights?

2. Pick and choose the workers to use E-Verify on?

3. Fire you because of E-Verify without explaining to you why or what your next steps were?

4. Ask to see your work documents again, after you had already been approved for employment?

If so, your rights may have been violated.
